

Idea meets Money 2016: High investment interest for Reactive Robotics

(15.03.2016)

Reactive Robotics was one of the ten invited presenters on the 2016 “Idea meets Money” Event in Salzburg. The participating Startups had three minutes time for presentation as well as another three minutes for questions. All contributions were made accessible to a broader audience via live-stream submission. The event also featured an instant evaluation option via SMS. Listeners were invited to vote during the presentations via their cell phones.

Reactive Robotics was the fifth Startup to present and our CEO, Dr. Alexander König, took the three minutes to excite the audience about Very Early Mobilisation and our Reactive Robotics solution. Live feedback showed that four of five voters would invest in our company!

“Idea meets Money” event 2016. High endorsement from voting audience.

If you are interested to learn more about Reactive Robotics and our solution for critically-ill patients, you can watch the three-minute presentation from Salzburg on the “Idea meets Money”-Website:
