

## Reactive Robotics ranked Top 3 on this years Startsummit in Switzerland

(22.03.2016)

ReActive Robotics was chosen as one of the top 3 startups out of 200 companies at the St. Gallen Start-SUMMIT 2016.

The conference committee invited 30 startup applicants to give a three-minute presentation in front of an experienced startup/investor board. 16 of the startups were admitted to semi-finals, which was another round of presentations evaluated by a different jury.

Reactive Robotics, represented by our CEO, Dr. Alexander König, was successful in both rounds, and thus has been invited to present as one of eight finalists in front of the entire conference audience and a jury of renowned venture capitalists.

Finally, our company has been ranked top 3 of all participating startups, confirming our product idea as relevant and our business case as attractive. We are proud to get recognition for the hard work our team is doing day by day.
