

Reactive Robotics ranks in top 5 of the *Science4Life Venture Cup*, Phase 1

(06.12.2016)

Since 1998, the founders' initiative "Science4Life" has been organizing its business plan competition, the *Science4Life Venture Cup*. It is the biggest industry-sector-specific business plan competition in Germany and with more than 80.000 € in prize money, one of the most lucrative ones. The competition consists of three phases each held in the two future-oriented fields *Life Sciences and Chemistry* and this year's newcomer *Energy*. Overall there were more than 80 submissions in the first phase, the so called "Idea Phase", of which the top 30 received an invitation to a one day workshop with experts. The top five of *Life Science and*
