

Junior Experts of the Japanese - German Exchange Program visited Reactive Robotics to gain first hand insights into German Healthcare Service ROBOTIC developments

(13.07.2017)

On behalf of the **German Federal Ministry of Education and Research** the Japanese – German Center Berlin / ベルリン日独センター organized an Expert Exchange Program (JEK) for outstanding junior scientists. <http://www.jdzb.de/austauschprogramme/junior-experts/>

This year, the focus of the exchange was on service robotics. Renowned institutes and companies in the field were selected to provide insight into the research, working environment and procedures found in Germany.

Reactive Robotics was pleased and honored to host Mr. Nobuyuki Hamanaka, consul for economic affairs, and the group of eight delegates as one of the selected start-up companies.

Dr. Helfried Peyrl, CTO of Reactive Robotics, and **Stefanie Krieger** presented live demonstrations of our research and development in the specific field of service robotics in the healthcare sector.
